2nd French-German Call for Projects on Antimicrobial Resistance
2020
Frequently asked questions

Last updated: December 18th 2019

Is it required to set Milestones in the project plan?

- Yes, milestones should be set.
- The achievement of a milestone should be a go/no-go criteria for the continuation/success of the project.
- Milestones should mark critical timepoints with strong impact to the success of the project and/or to the timeline of the project.
- Usually, a milestone is achieved when critical results have been generated.

Should Milestones be presented and defined in a certain way?

- Yes, it is beneficial to present the Milestone(s) in the Gantt chart and to show their temporal relation to the work packages.
- Milestones should be phrased and defined in a measurable way. They should be achieved on a specific date (e.g. end of project month 12) and contain precise (minimum or maximum are possible too) amounts or numbers to be achieved.

Is it possible to get consultancy on the proposal before submission?

- For questions related to the content of the proposal, please contact the Joint Call Secretariat preferably by e-mail (AMR.2@vdivide-it.de). Alternatively, you may refer to the call text and call your national contact point.

How many project partners can be included at maximum?

- There is no maximum number of partners. However all partners of a consortium should have expertise and tasks that are essential for the success of the project with respect to the topics of the call.

Is there a maximum for the total budget per project?

- The total budget of one joint project should not exceed 1 Million Euro.

Is it possible for one applicant to be a partner in more than one proposal?

- Yes. This will not affect the selection process which is based on quality criteria set in advance.

What is the maximum duration of the proposed projects?

- The duration of the projects must not exceed 3 years.

Is there a minimum duration of the proposed projects?

- No, however the project timeline should correspond to the planned work and reflect efficiency.

When can a project start at the earliest?

- The consortium has to choose a common start date.
- There is no date fixed, however due to the two-stage procedure in Germany consortia should plan for a project start in Januar 2021.
